

Use concrete models and visuals to add two numbers using compensation strategy.

CCSS.MATH.CONTENT.1.NBT.C.4 | G1M06C33

Jax, Jane, and Mr. Columbus are very excited to see the the different creatures in the underwater habitat. By the end of this adventure, they have to submit a report on the underwater world. They need the help of your amazing math skills to keep a track of the things they see.

1

Jax, Jane, and Mr. Columbus see 16 blue sharks and 5 killer sharks. What is the total number of sharks that they see? Write your answer in the boxes given below.

Draw the rods and blocks

--	--

Use the operation
(+, -)

--	--

=

--	--

2

They also see 49 swordfish on the left side and 35 on the right side. How many swordfish do they see in all? Calculate using compensation strategy and write your answer in the boxes given below.

--	--

Use the operation (+, -)

--	--

=

Rearrange the rods and blocks for easy addition

--	--

Hint: Make 49 a friendly number by moving  from

to

Compensation strategy

--	--

Use the operation
(+, -)

--	--

=

--	--

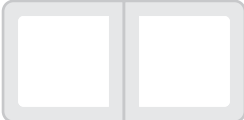

Total number of
swordfish

Use concrete models and visuals to add two numbers using compensation strategy.

CCSS.MATH.CONTENT.1.NBT.C.4 | G1M06C33

3

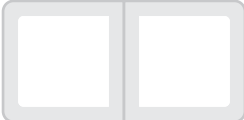

Jax and Jane note that there are 77 blue starfish and 18 red starfish. Find the total number of starfish using compensation strategy. Write your answer in the boxes given below.

Number of blue starfish

Use the operation (+, -)

Number of red starfish

=

Total number of starfish

Rearrange the rods and blocks for easy addition.

Compensation strategy

Use the operation (+, -)

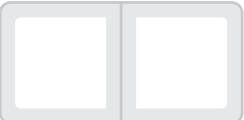

=

Total number of starfish

4

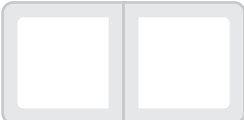

Mr. Columbus sees 38 pink and purple jellyfish each. What is the total number of jellyfish that he sees? Calculate using compensation strategy and write your answer in the boxes given below.

Number of pink jellyfish

Use the operation (+, -)

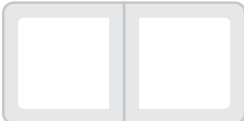

Number of purple jellyfish

=

Total number of jellyfish

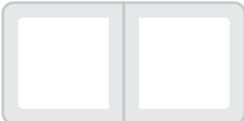

Rearrange the rods and blocks for easy addition.

Compensation strategy

Use the operation (+, -)

=

Total number of jellyfish

Use concrete models and visuals to add two numbers using compensation strategy.
