

Solve real-world mathematical problems involving perimeters of polygons. Find the perimeter using the length of the sides and vice-versa. CCSS.MATH.CONTENT.3.MD.D.8 | G3M4C24E1

King Septus decides to move to a new planet. Help his ministers Kodus and Klang set up a colony on the new planet.

1

The colony is rectangular in shape. Find the total length of the sides of the colony. Write your answer in the boxes given below.

$$\boxed{} + \boxed{} + \boxed{} + \boxed{}$$

AB BC CD DA

Total length of the sides of the colony = $\boxed{} \boxed{}$ ft

2

Kodus designs a road as shown below. Find the perimeter of the road. Write your answer in the boxes given below.

Perimeter of the road = $AB + BC + CD + DA$

$$\boxed{} + \boxed{} + \boxed{} + \boxed{}$$

AB BC CD DA

Perimeter of the road = $\boxed{} \boxed{}$ ft

3

Klang designs a park. Find the length of the boundary of the park. Circle the correct option.

90 ft

80 ft

84 ft

Solve real-world mathematical problems involving perimeters of polygons. Find the perimeter using the length of the sides and vice-versa. CCSS.MATH.CONTENT.3.MD.D.8 | G3M4C24E1

4

Klang designs a meeting hall in the colony. Find the perimeter of the hall. Check ☒ the correct box.

92 ft

94 ft

A

King Septus wants a playground built in a symmetrical shape. Find the perimeter of the playground. Write your answer in the boxes given below.

Perimeter of the playground. = ft + ft

Perimeter of EFAB

Perimeter of BCDE

= ft

The length of the sides on the other half of the figure are equal because the figure is symmetrical. Am I correct? Circle the correct option.

Yes

No

Solve real-world mathematical problems involving perimeters of polygons. Find the perimeter using the length of the sides and vice-versa. CCSS.MATH.CONTENT.3.MD.D.8 | G3M4C24E1

King Septus wants a polygon-shaped garden in the colony. Help Kodus and Klang make a garden.

- 1 Klang wants a square-shaped nameplate for the garden. Find the length of the boundary of the nameplate shown below. Check ☒ the correct box.

40 in

121 in

44 in

11 in

The length of the boundary of a closed shape is called its perimeter. Am I correct? Circle the correct option.

Yes

No

- 2 Kodus wants to build parallelogram-shaped flower beds in the garden. Help him match the given perimeters with the correct parallelograms.

Hint: Opposite sides of a parallelogram are equal.

54 ft

58 ft

56 ft

Solve real-world mathematical problems involving perimeters of polygons. Find the perimeter using the length of the sides and vice-versa. CCSS.MATH.CONTENT.3.MD.D.8 | G3M4C24E1

3

Klang builds a symmetrical signboard for the garden. Help him find the perimeter of the board. Check ☒ the correct box.

40 ft

25 ft

50 ft

4

Kodus wants to make a birdhouse with perimeter 24 in. Help him find the length of the unknown side of the birdhouse. Circle the correct option.

2 in

7 in

10 in

A

A wire is drawn 4 times around a garden. Find the required length of the wire. Write your answer in the boxes given below.

Perimeter of the garden =

AB

+

BC

+

CD

+

DA

Required length
of wire

=

× 4

Perimeter of the garden

=

ft

Solve real-world mathematical problems involving perimeters of polygons. Find the perimeter using the length of the sides and vice-versa. CCSS.MATH.CONTENT.3.MD.D.8 | G3M4C24E1

Help Kodus and Klang build a fountain in the garden to surprise King Septus.

Step 1:

Check ☒ the shape of your choice for the base of the fountain.

Write the perimeter of the shape selected above in the given boxes.

		ft
--	--	----

Step 2:

Kodus wants the water passage to be in a symmetrical shape. Check ☒ any one shape of your choice.

Circle the perimeter of the shape selected above.

32 ft

28 ft

Solve real-world mathematical problems involving perimeters of polygons. Find the perimeter using the length of the sides and vice-versa. CCSS.MATH.CONTENT.3.MD.D.8 | G3M4C24E1

Step 3:

Check ☒ any one box to select the shape of the fountain when viewed from the top.

Write the perimeter of the shape selected above in the given boxes.

ft

Step 4:

It's time to build the fountain.

- Connect the correct dots to make the shapes selected in **steps 1, 2, and 3.**
- Color the shape of the base **green**, the water passage **blue**, and the top of the fountain **red**.

Base of the fountain

Water passage

Top of the fountain

Well done! King Septus is impressed with the fountain. He rewards Kodus, Klang, and you with amazing presents.
